

Basic Program Structure

More on Selection (Branching)

At the end of this lesson, you should be able to:

- Apply the following selection (branching) structures:
 - IF-ELSE statement
 - Nested IF statement
- Use Logical/ Boolean Operators to chain expressions

Topic Outline

IF-ELSE Statement

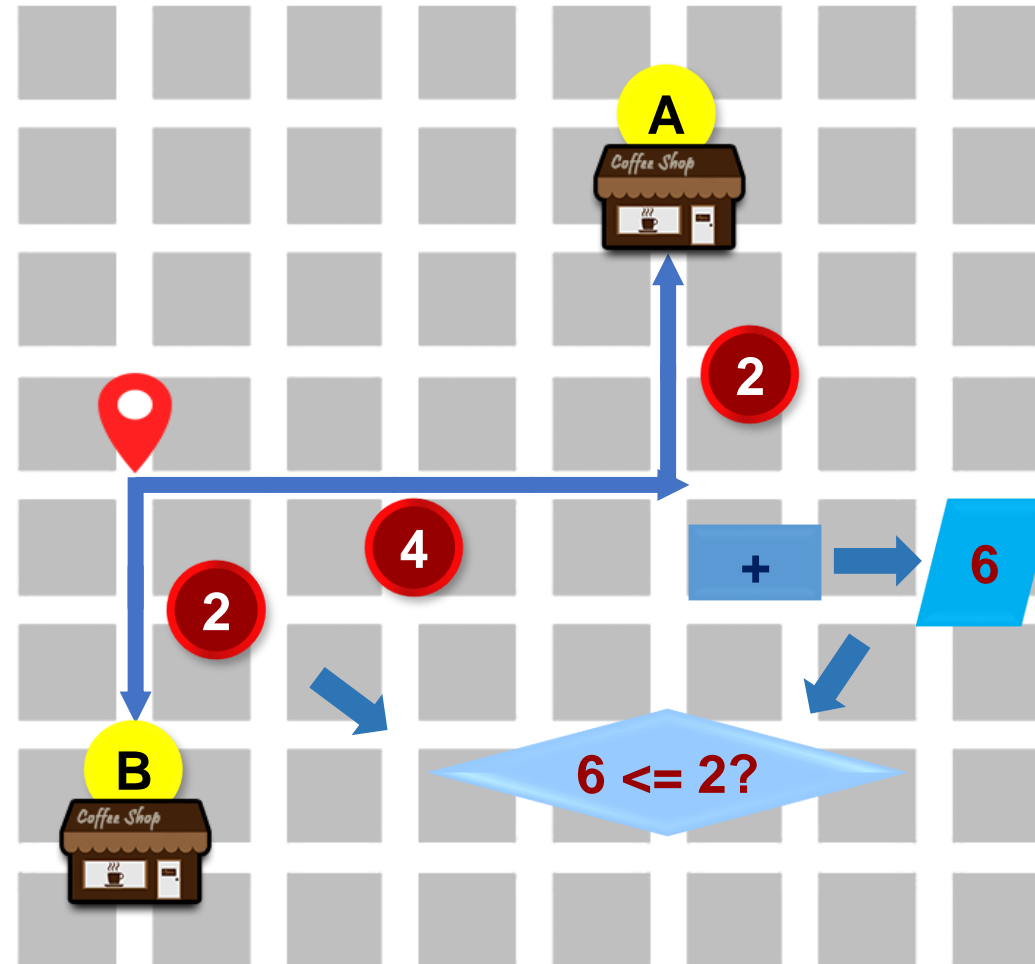

Boolean Operators

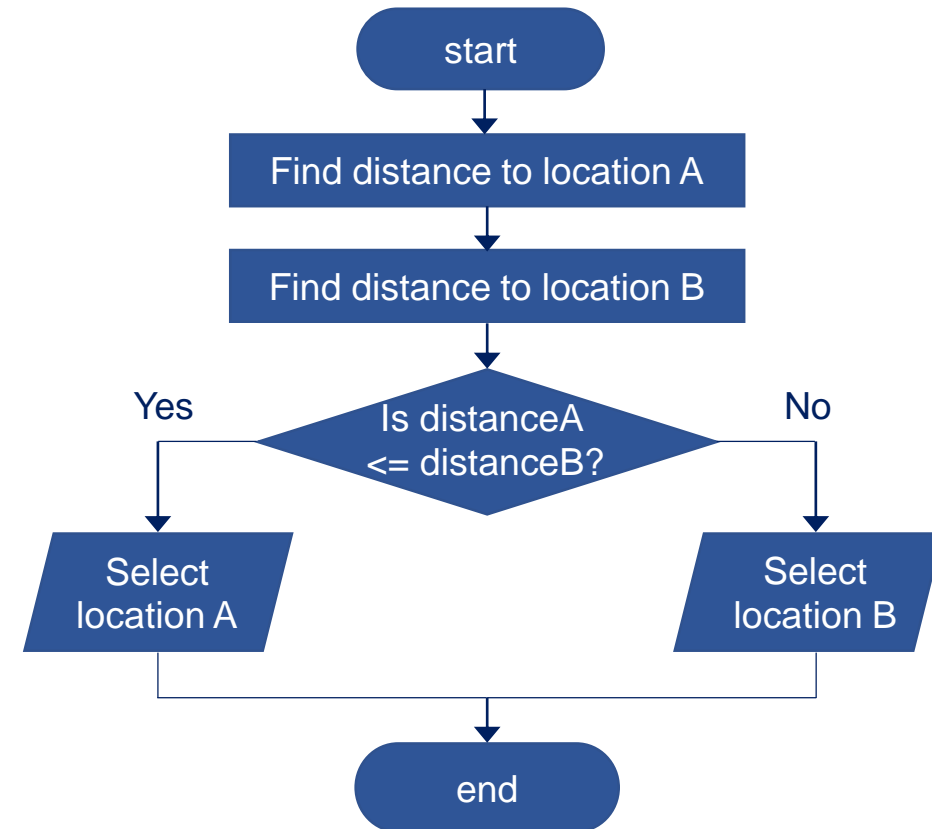

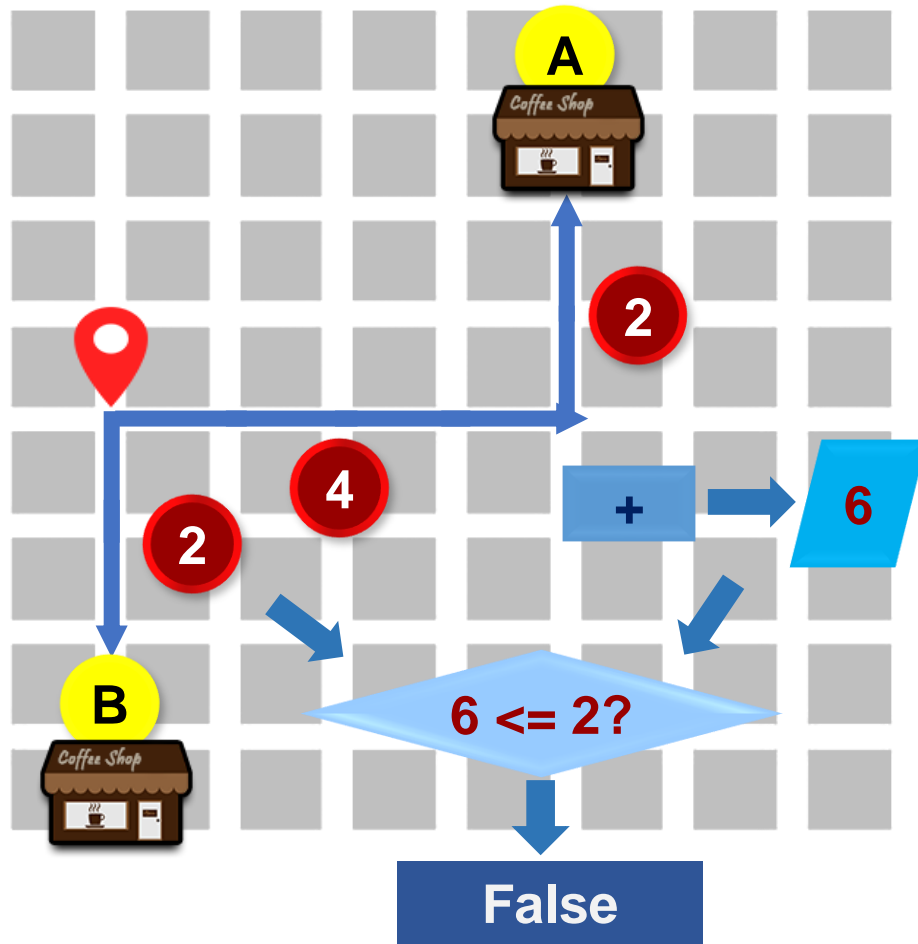

Nested IF Statement

Scenario 5: Find the Nearer Coffee Shop

Scenario 5: Find the Nearer Coffee Shop (Cont'd)

IF-ELSE Statement

A single
IF-ELSE
statement in
the top level

Pseudocode

IF condition is True

THEN

 SUITE1 ← Execute the True part if the condition is True.

ELSE

Note the same amount of indentation used.

 SUITE2 ← Execute the False part if the condition is False.

END IF

... ← Continue the sequence by executing the next instruction.

IF-ELSE Statement (Cont'd)

Alternatively, when visualized as a flowchart:

Pseudocode

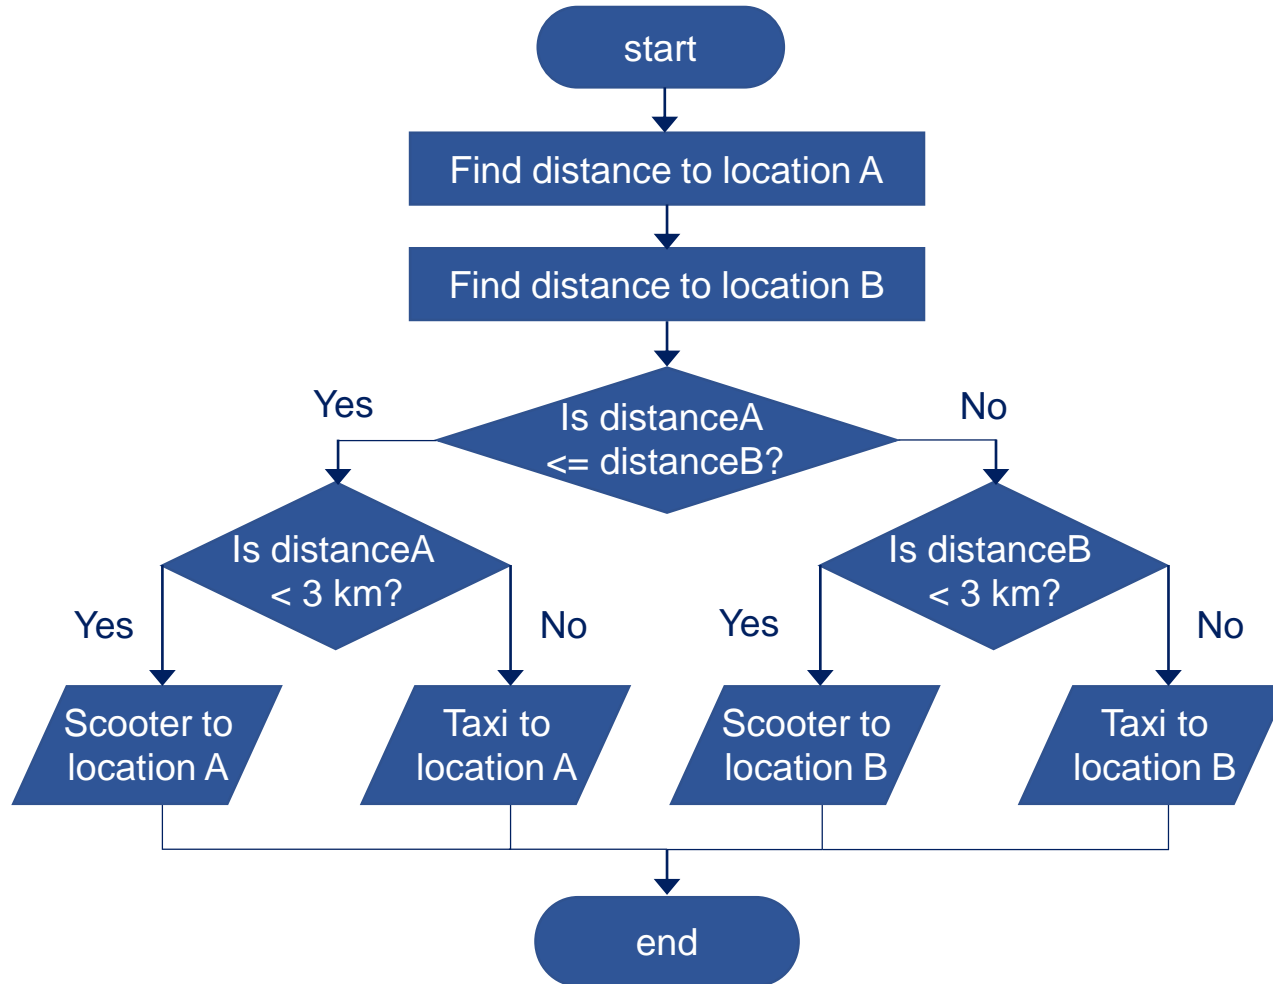

```
IF condition is True
THEN
    SUITE A
ELSE
    SUITE B
END IF
...
```

Scenario 6: Decide Transportation to the Nearer Coffee Shop

Scenario 6: Decide Transportation to the Nearer Coffee Shop

Pseudocode

IF condition1 is True THEN

DO THIS SUITE ← For each IF statement, there is an associated block for its True part.

END IF

...

Logical/ Boolean Operators

Logical operators **connect** Boolean values and expressions and **return** a Boolean value as a result.

| A | B | not A | A and B | A or B |
|-------|-------|--------------|----------------|---------------|
| False | False | True | False | False |
| False | True | True | False | True |
| True | False | False | False | True |
| True | True | False | True | True |

| Operator | Example | Meaning |
|------------|--|--|
| not | not num < 0 | Flip T/ F |
| and | (num1 > num2) and (num2 > num3) | Return True only if both are True |
| or | (num1 > num2) or (num2 > num3) | Return True if either one is True |

What is the value of the given expression?

(**not** (10>=20) and **not** (10<30))

Quick Check: Answer

What is the value of the given expression?

(**not** (10>=20) **and** **not** (10<30))

Answer

False

Nested IF Statement

Inside the True Block

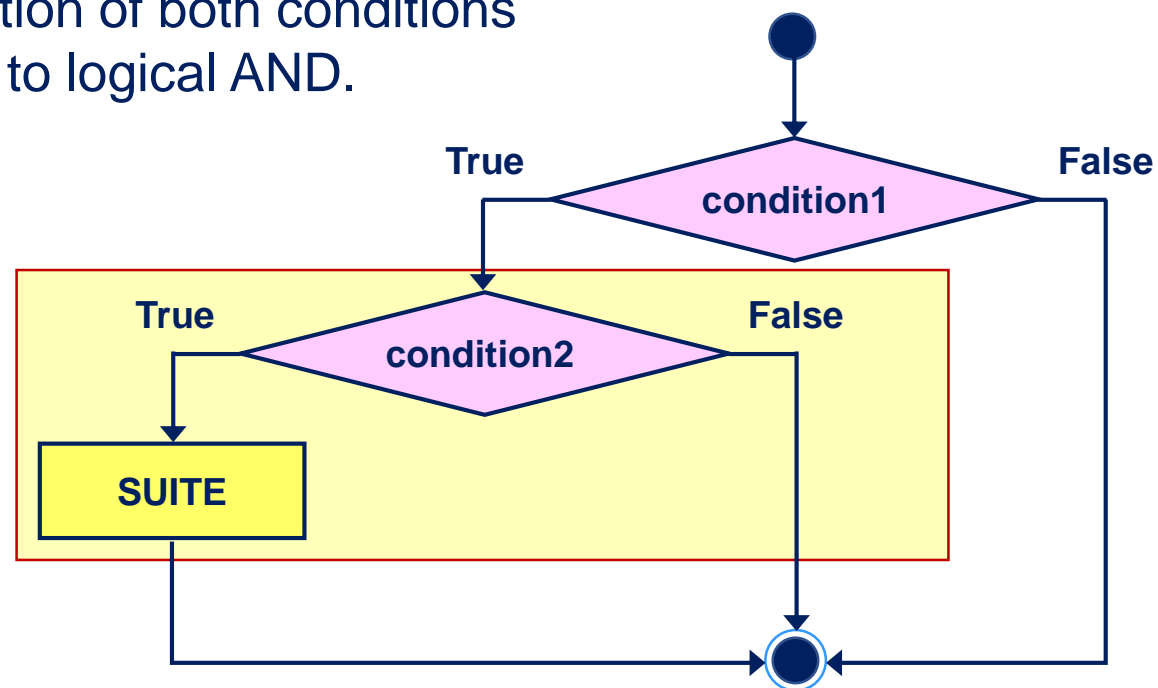

Can there be another IF statement(s) inside the **True Block**?

Pseudocode

```
IF condition1 is True THEN
    IF condition2 is True THEN
        DO THIS SUITE
    END IF
END IF
...
```

Combination of both conditions is similar to logical AND.

Nested IF Statement (Cont'd)

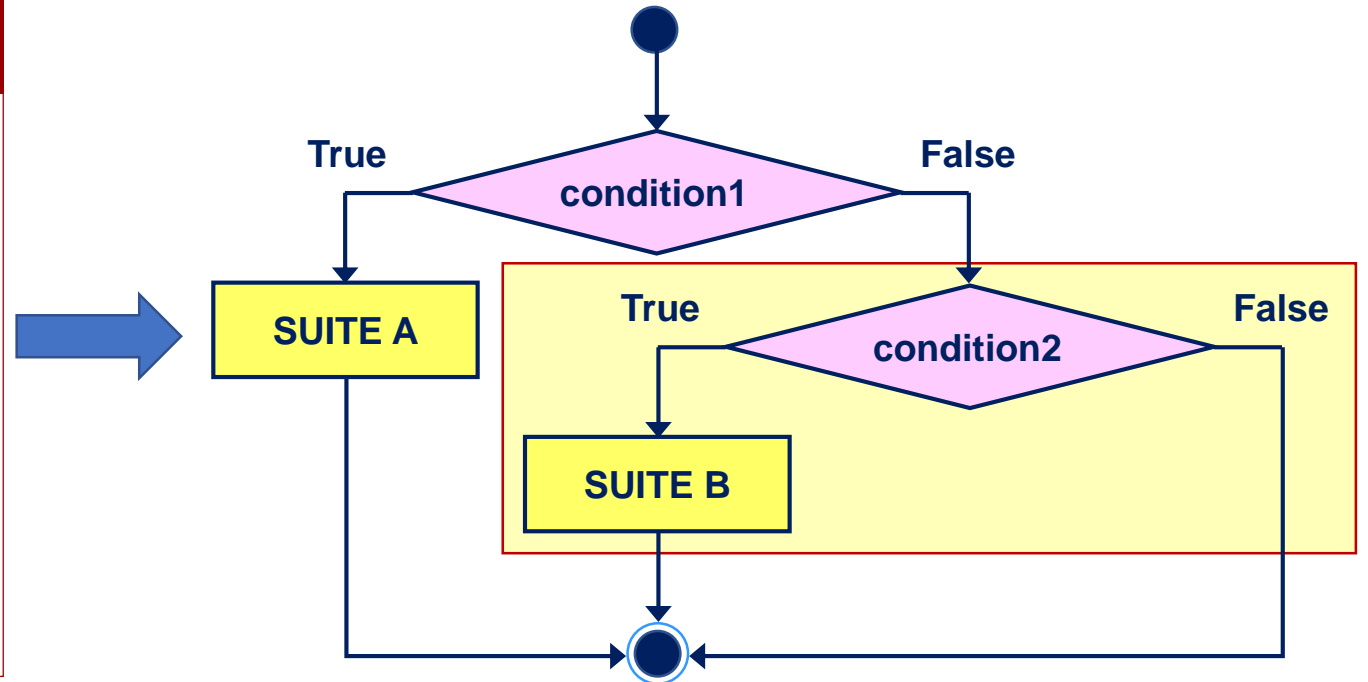

Inside the False Block

Can there be another IF statement(s) inside the **False Block**?

Pseudocode

```
IF condition1 is True THEN  
    DO SUITE A  
ELSE IF condition2 is True THEN  
    DO SUITE B  
END IF  
END IF  
...
```

Nested IF Statement (Cont'd)

Inside the True Block of the True Block

Can there be another IF statement(s) inside the **True Block of a True Block**?

Pseudocode

```
IF condition1 is True THEN
  IF condition2 is True THEN
    IF condition3 is True THEN
      DO THIS SUITE
    END IF
  END IF
END IF
...
```

We do this only if condition1, condition2, and condition3 are true, similar to logical AND.

Try creating its equivalent flowchart.
Use the previous flowchart as a reference.

Nested IF Statement (Cont'd)

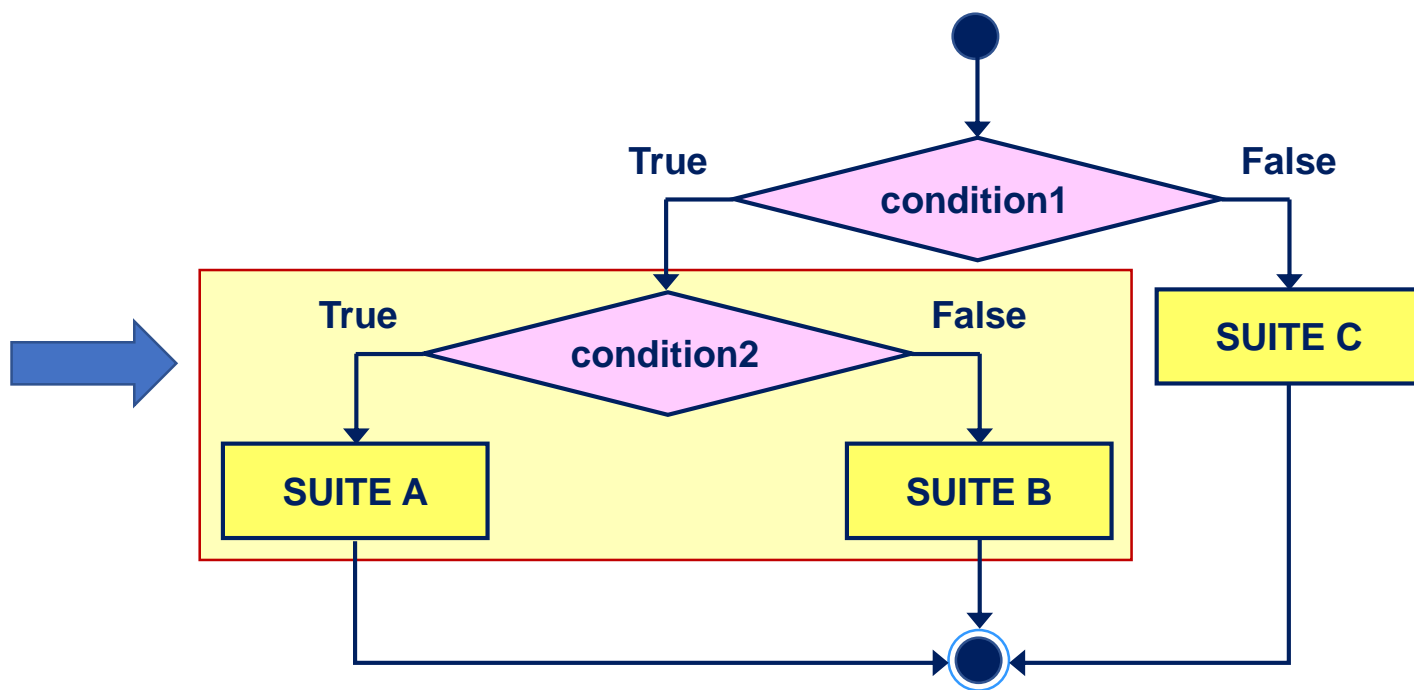

IF-ELSE Statement(s) Inside the True Block

Can there be another IF-ELSE statement(s) inside the **True Block**?

Pseudocode

```
IF condition1 is True THEN
    IF condition2 is True THEN
        DO SUITE A
    ELSE
        DO SUITE B
    END IF
ELSE
    DO SUITE C
END IF
...
```
